October 2, 2003

Celebrate National Chemistry Week at the Public Library (October 19–25)

National Chemistry Week (October 19–25) brings local chemists and the Public Library together under one big “laboratory” to explore this year’s theme, *Earth’s Atmosphere and Beyond*. A series of fun, interactive demonstrations at the Main Library and various branches will help children better understand their environment. The free programs, made possible by the Cincinnati Chapter of the American Chemical Society, promote public awareness on how chemistry relates to keeping everything around us clean in a fun and lively way. Instructions for experiments will also be given so children can do some at home with adult supervision. Visit the Library’s web site at www.CincinnatiLibrary.org, then click on the programs section on the homepage, for more information on free chemistry demonstrations at the branch nearest you.

During National Chemistry Week (October 19–25) children can “experiment” with fun at the Public Library. This year’s theme is *Earth’s Atmosphere and Beyond*.
