

Funding for the Future

YOUR PUBLIC LIBRARY is a powerful place for personal growth. It's a dynamic place, a place of opportunity for all. Many individuals, foundations, and companies have provided funding because they see the Library improving lives every day—in every neighborhood—by opening doors to a world of information and ideas. However, the cost of running one of the busiest public library systems in the nation continues to rise. Thank you to all of our donors whose contributions to the Library and its Foundation have helped purchase new books and materials for the collection, as well as grow programs and services for children, teens, and adults that advance literacy, lifelong learning, and technology skills. For questions related to giving opportunities, please contact the Development Office at (513) 369-4591.

> The Library is the ultimate eco-friendly organization. Its role in lending books and making a myriad of materials available electronically saves thousands of pounds of paper and waste from going into our community's landfills. You can borrow books and read them, and then someone else can make use of them. One little library card can have a huge impact on our environment for future generations throughout the Galaxy!
